

# Welcome to Björnhyltans Garden

We are a small, very special garden, that is worth a visit. For over 10 years, we, the couple Lotta and Peder Wendefors, have created a visitgarden around the greenhouse which we build in 2005. Since 2002 we have grown and sold vegetables from the open fields and before that we grow for our own needs for many years. Today you can buy the vegetables we produce in the farm-shop that is open from July to September, every Thursday - Friday from 14:00 to 19:00.

In the greenhouse there is a "room fo life" with Mediterranean feeling. There we grow grapes, figs and an olive tree. The other part of the greenhouse is used for producing tomatoes, cucumbers, beans, etc.

At one of the stonewalls there is a herb-garden with our most common herbs. Many butterflies usually visit that part of the garden.

When the farm-shop is open, it is free to visit the garden, greenhouses and growing areas. You can also buy some coffee and ice-cream in the greenhouse or bring your own picknick. Other days or times of the year groups can book a visit or guide (see contact details).

South of the greenhouse there is a growing area where we use "cover-cultivation" to create the best soil for vegetables and flowers to grow in.

If you walk around the garden you will also find a couple of small ponds, all for the benefit of wildlife in the garden and for the balance of predators and pests.

If you want to go for a long walk (1.5 km) there is the "Carlssons footpath" which is a footpath around the farm, with information about previous generations life on Björnhyltan.

Every Thursday when the farm-shop is open, you can join a guided tour in the garden. During the tour Peder explains what he grows and gives culture advices and inspiring conversations about how to "grow and live" organic. The swedish guidance starts at 18.00 and costs 50 kr. Please give us a call if you want a guidance in english, if possible we take it an our earlier.

**Welcome to visit us, buy something in our farm-shop and be delighted in our garden.**
